

About Dave

Hello, my name is Dave de Fijter, founder of Indentity.

After years of work as a PHP and Python/Django developer I decided to start my own company. A company where I can focus on the latest technologies and where code quality comes first. This has become Indentity.

Currently I'm specialized in Django/Python development and clientside development (HTML/CSS/Javascript/jQuery).

Curriculum Vitae

Personal Data

Full name

Dave de Fijter

Place of birth

Rotterdam

Projects

- The development of the travel sites by 4ElementsTravel. 4ElementsTravel offers social travel sites based on specific niches like kitesurfing, golf or scuba-diving. Indentity created the complete 4ElementsTravel platform on a reusable way so a new subsite can be added with minimum effort, it's the same code but with different data and looks. Indentity developed the complete platform and corporate identity for 4ElementsTravel.
- De technical design, development and implementation of a new multimedia tour application for Museum Boijmans van Beuningen, the Boijmans Tour. This system is currently used in the museum as a virtual tour-guide providing video, audio and other interactive elements for the complete collection of the museum on your own smartphone or on a iPod Touch provided by the museum.
- The development of a fully customisable online e-learning platform for operational safety purposes with the name Cursafe. Indentity developed the whole system from scratch including naming the company and the full corporate identity.
- Development of a new online learning platform for beginning Django developers: Django101.com
- Development of the Fashiolista iPad app
- Maintaining and extending App-Ologies, a online platform for mobile application development.
- Development and realisation of the Peanutbutter-Post video-interview project for Museum Boijmans van Beuningen.
- Providing maintenance tasks for the ArtTube and Online Collection applications for Museum Boijmans van Beuningen
- Development of the Easy TAN mobile app for Android (10.000+ downloads)
- Development of the Fashiolista iPhone app
- Designing and developing various projects for Fabrique.
- Designing and developing grindvloeren-plan.nl, a django powered site for a local company

- Designing and developing baseinterieur.nl, a django powered site for a local company
- Designing and developing for YouTellMe.nl, a social shopping site. (Techniques: django, python, postgresql, javascript, html)
- Designing and developing an extranet including PHP framework for the Rotterdam Climate Initiative (Capica BV)
- Assembling and setting up a stable up-to-date Gentoo Linux development webserver complete with PHP5, Apache 2, MySQL 5, SSH, WebDAV, SVN, Trac and Python for Capica BV
- Designing and developing a REST based TBlox API to contact TBlox modules from all over the web.
- Designing and developing a Web 2.0 personal webportal named myTBlox/myCockpit Beta (like Netvibes and iGoogle). Complete with own TBlox gadgets and a own XML based gadget standard.
- Designing and developing a support module wich handles all support requests to TBlox (TBlox Assist, Support requests, help and actionlogger). I graduated on this project at Rotterdam University with a 9 out of 10.
- Designing and developing barcode scan software in Visual C# for TBlox.
- Developing a general web styleguide based on earlier proposals for better lay-out and usability of the TBlox modules.
- Recruiting, Interviewing and Educating new TBlox employee's and graduates within TBlox.
- Designing and developing a payment service for TBlox (TBlox Credits). Every TBlox payment runs through this module.
- Re-developing the UI and general Usability for specific TBlox modules.
- Starting up and running my own computer hardware (web)shop as my internship at Kewi Boten BV.
- Designing and developing a Microsoft XNA Game (XBox 360 Ready) in Visual C#. Introduced XNA to Rotterdam University.
- Designing and developing a car portal site (carowners.nl, offline now) with CMS at Rotterdam University.
- Designing and developing a real estate agent website: (Match Makelaars) with CMS in PHP(3) and MySQL at Webgids Internet
