

Services offered by Indentity

Complete solutions

Indentity can arrange a full solution for you when it comes to web applications. If it's technically possible we can make it for you. Some examples:

- A new corporate website
- A mobile application next to your existing site
- Social media integration
- Data aggregation
- A corporate extranet
- A advanced web application
- API development

We will guide you through the process in small steps so you know what is going on and you know what you can expect when it's done.

Complete solutions are offered at a fixed or hourly rate. For more information please contact us.

Technical implementations

If you've already got a design and you just need a technical implementation of your web application we can do the job for you.

Indentity is specialized in both frontend- as serverside development using Python, Django, HTML, CSS, Javascript and jQuery.

Advice

We understand as no other that not everyone is as web-savvy as us. That's why we like to give you advice about the possibilities of the web.

We know everything about the latest trends, technologies and innovations and we would love to help you out with the technical details of your ideas and concepts.

For more information please contact us.

Freelance development

If you are just looking for some extra programming power in your development team Indentity is the company for you. Developers working for Indentity are very professional and integrate seamlessly in your team. Indentity is specialized in Python, Django, PHP, HTML, CSS, Javascript and various frameworks.
